Asunto	SET MAINTENANCE INTERVAL AVENTURA 500 (8000KMS)
Subject	

Greetings,

The procedure to remove the service symbol that appears at the top of the Aventura 500 screen when the bike has exceeded the service distance is as follows:

1. Turn the ignition key of the motorbike to the ON position.
2. Activate the left indicator and wait for it to flash, turn the indicator off immediately.
3. Activate the right indicator and wait for it to flash, turn the indicator off immediately.
4. Press the MODE button twice in succession.

This sequence must be carried out quickly and quickly, if it is done correctly you will enter the maintenance menu, in this menu you can vary the interval between services, it is recommended not to vary the interval and leave the default 8000 km.

If the maintenance menu is not accessed, it means that the sequence has not been carried out correctly or has been carried out too slowly, in this case repeat the sequence again.

5. Press the MODE button until you are on "Reset" and press the SET button to confirm the option. Once the option has been confirmed the symbol will disappear from the display.

If the selection is not made quickly, the screen returns to the start screen automatically and the sequence must be repeated to access the maintenance menu again.

Please do not hesitate to contact us if you have any questions. Yours sincerely,

The RIEJU, S.A. team.
